PICKETT'S OHIO GROWN FRUIT TREES

For more than ninety years we have given special attention to Fruit Trees, growing them with utmost care and skill in our own large Nurseries. Pickett's trees are good trees and are sold at reasonable prices. We propagate our Fruits under careful conditions, selecting buds from bearing trees of outstanding merits. This is your assurance that our trees are pure and of the best strains.

Well cared for in the Nursery, the trees are thrifty and well-rooted. We dig them carefully, running the digger very deep so that you get all the feeding and fibrous roots and you know the trees can grow.

The farmer and gardener who has bearing Fruit Trees makes money. Plant some trees this year and every year.

The laws of nature make trees bear better in groups, so plant more than one variety of each fruit so they may cross pollinate.

Number of Trees or Plants for an acre of Ground Set at Regular Distance Apart

Feet		Feet	
1 by 1.....	43560	5 by 5.....	1742
2 by 1.....	21780	6 by 6.....	1210
2 by 2.....	10890	8 by 8.....	680
3 by 1.....	14520	10 by 10.....	435
3 by 3.....	4840	16 by 16.....	170

5 by 3.....	2904	40 by 40.....	27
5 by 4.....	2178	50 by 50.....	17

Rule: Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43560) will give the number of trees to an acre.

APPLE

Our trees grow rapidly, bear young and produce heavily. A careful selection of varieties will give you superior fruit all summer, fall and winter.

Listed in Order of Ripening

Early

- **REDHAVEN**—It is practically the earliest peach that we have, and as it carries a good red color long before it ripens, you can pick it almost any time you desire. Fruit is very firm, easy to handle, bright red in color with a golden firm-textured flesh.
- **CUMBERLAND**—The fruit is large and is attractively colored with red, and is oval in shape. The flesh is white.
- **FAIR HAVEN**—Large, nearly round. Bright golden color with red cheek. Skin is tough and fruits are firm, fine texture and of good quality. Ripens a week before Hale Haven and right at the end of the Redhaven season.
- **GOLDEN JUBILEE**—Very early. Fruit is somewhat oblong in shape and has a brilliant golden color with a slightly red cheek. It is golden-fleshed, very juicy, and a free-stone. The tree is extremely hardy.

Midseason and Late

- **CHAMPION**—The hardiest, most productive, finest flavored white fleshed free-stone. Very sweet and juicy, very high flavor.
- **HALE HAVEN**—Color all red long before it is ripe, and retains its richness of flavor over a long period. Is round in shape, very sweet flavor and ripens about a week before Elberta.
- **ZARN**—As large as Elberta and better colored and far better quality. Ripens about a week earlier than Elberta.
- **SUN-GLO**—Yellow, large and handsome, delicate flavor. Is an improved South Haven.
- **EARLY ELBERTA**—A new early form of Elberta which has similar fruit. Ripens seven to ten days earlier.

- ✓ J. H. HALE—The size of the fruit is very large and highly colored. Flesh is golden yellow, firm, and has a most delicious flavor. Fruit ripens a few days before Elberta.
- ✓ IMPROVED HALE—A very fine late yellow peach. Large and delicious. Ripens with the last of the Elbertas.
- ✓ ELBERTA—The most widely planted of all Peaches. This popular variety has firm, juicy flesh. Ripens in mid-September.
